

Recipient Onboarding Structure, Reference Document

Surplus Food Redistribution Network (Private Recipient Website)

This document captures the agreed recipient onboarding flow, recipient types, and field-level decisions mirroring the donor reference doc. **Already built this has been implemented.

1. Recipient Onboarding Flow

...

Recipient

↓

Choose recipient type

↓

[Food Pantry / Soup Kitchen / School Meal Program / Community Organization / Regional Food Bank]

↓

Organization information

Recipient Dashboard

...

Same flow applies to **all five recipient types** — no separate registration paths, just conditional fields inside the "Organization information" step.

2. Recipient Types (All Live in MVP)

Same treatment as donors: unlike the original documentation (which scoped only Food Pantry for MVP and treated the rest as future expansion), this build includes **all five types as active recipient categories from launch**:

1. Food Pantry
2. Soup Kitchen
3. School Meal Program
4. Community Organization
5. Regional Food Bank

3. Organization Information — Shared Core + Type-Specific Fields

Design approach: one reusable form component, with a small set of conditional fields shown based on the recipient type selected in the previous step — same pattern as the donor build.

Shared Core Fields (all recipient types)

- Organization Name
- Recipient Type **(auto-filled from previous step)**
- Address
- Registration / Nonprofit Number (for admin verification)

- Years in Operation *(optional)*

- Website *(optional)*

Type-Specific Fields

| Recipient Type | Extra Field(s) |

|---|---|

| Food Pantry | Households served weekly, Distribution model (Walk-in / Pre-scheduled pickup / Home delivery / Mixed) |

| Soup Kitchen | Meals served per day, Service days/hours |

| School Meal Program | Number of students served, School/district name |

| Community Organization | Organization mission/type, Nonprofit status |

| Regional Food Bank | Service area, Number of partner organizations |

4. Contact Information Step

****Decision:**** Same as donor — the contact person is the same person creating the account (single login, single primary contact — no multi-user org accounts at MVP stage).

Fields

- Contact Person Name

- Job Title / Role (e.g., "Pantry Coordinator," "Program Director")

- Phone Number

- Email *(becomes the login email — see Account Credentials below)*

- Preferred Contact Method (Phone / Email / In-app Messages)

5. "Capacity Information" at Signup — Clarified Scope

Mirrors the donor build's "Donation Information" distinction. This step is ****profile/capacity information****, not an actual reservation.

| | Signup: "Capacity Information" | Post-Login: "Reserve Food" / "Available Food" screen |

|---|---|---|

| Purpose | Describes the recipient's general receiving capability | Claims a specific, real donation listing |

| Contains | Food categories most needed, people served weekly, receiving frequency, general pickup/receiving availability, storage/refrigeration capability | Specific food item, quantity, pickup time, donor details |

| When filled | Once, during registration (editable later via Profile) | Every time a reservation is made |

| Used for | Helping donors/admins understand recipient capacity ahead of time | Actual, time-sensitive redistribution transaction |

Fields for Signup "Capacity Information" Step

- Food categories most needed (produce, bakery, dairy, prepared meals, packaged goods, meat & seafood)
- Estimated people served weekly
- How often the org can receive donations (Daily / Weekly / Occasional)
- General pickup / receiving availability window
- Storage / refrigeration availability on-site (Yes / No / Limited)

6. Account Credentials Step

Fields

- Email *(auto-filled from Contact Information, editable if a different login email is preferred)*
- Password
- Confirm Password
- Terms of Service / Privacy Policy agreement checkbox *(required)*

7. Account Created → Verification State

****Decision:**** Same verification-before-access model as donors. New accounts land in a ****Pending Verification**** state, not full dashboard access.

Flow

...

Review & Submit

↓

Account Created

↓

Pending Verification screen

(org can log in, view status, edit profile —
cannot reserve food until approved)

↓

Admin Approves

↓

Full Recipient Dashboard unlocked

...

Pending Verification Screen — Contents

- Status message (e.g., "Your account is under review")
- Editable organization profile while waiting
- No access to: Browsing available donations, Reserving food, Messaging donor organizations
- Notification sent automatically ("Account Approved") when admin approves

8. Open Items for Future Decisions

- Whether multi-user org accounts (separate login vs. contact person) should be added post-MVP
- Verification requirements per recipient type (e.g., does School Meal Program need district authorization documentation?)

- Whether "Capacity Information" profile data should pre-fill filters on the "Available Food" browsing screen
